ELECLIP INTERIOR SYSTEMS

Eleclip Interior Systems are the perfect package to revitalize existing car enclosures. A bright new modern upgrade to elevators enhances your buildings image.

Utilizing a unique patented attachment system, elevators can be completely upgraded in less than one day. This pre-engineered system is flexible and easy to install.

The unique and versatile ceiling design works with various escape hatch locations and incorporates energy saving LED light technology. More durable and attractive than existing ceilings offered today.

Not removing existing finishes? Eleclip has a lightweight design that utilizes honeycomb aluminum to minimize the installed weight. Some packages are as light as 400 pounds including ceiling.

Crisp metal looks are obtained by utilizing a V-grooving process. Back cutting the metal minimizes the radius bend and provides a machined appearance and tight seams.

Our state-of-the-art CNC Router cuts panels precisely and efficiently for a perfect fit.

MANUFACTURING TECHNOLOGY

V-Groove Machine

CNC Router

IMPERIAL

The Imperial package utilizes vertical panels above a ventilated base with a ventilated frieze. Panels can be finished in plastic laminate, metal finishes, wood veneers and composite materials. This sleek traditional look can be matched with reveals in various metals and/or finishes.

MANHATTAN

The Manhattan package is an arrangement of vertical panels separated by a mid panel. Handrails are typically mounted on the mid panel for a clean durable mount. The panels can be finished in an array of colors and materials. This package provides a unique design to highlight your cabs interior.

BISCAYNE

The Biscayne package is a unique arrangement of horizontal panels that span the width and depth of your cab interior. Stainless corner sections highlight the applied panel look. Separating each panel is an aluminum trim piece that projects slightly above the panels. This creates an in-layed look into the panels. This can be combined with all metal, laminate and composite finishes.

EXECUTIVE

The Executive package combines horizontal panels below the handrail with vertical panels above. A stainless handrail panel provides a clean transition for the panels. Panels can be finished in a variety of materials, finishes and colors. The panel layout allows for a very custom look.

DETAILS

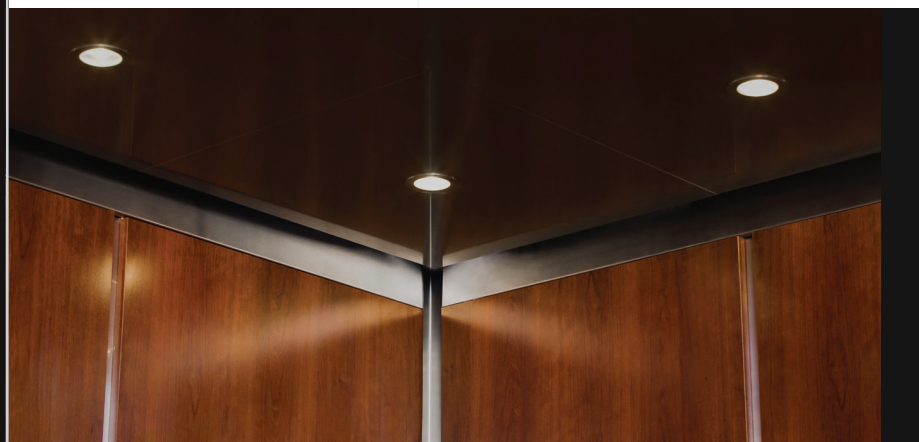

Biscayne with round stainless handrail

Eleclip utilizes the latest mounting technology to securely attach handrails from inside the cab.

Biscayne with raised aluminum trim

The Biscayne has inlaid metal trim to separate panels and provide a clean accent to the wall design.

Stainless ceiling with LED downlights

Lightweight ceilings with energy saving LED downlights are available in various finishes including stainless and bronze muntz.

CAB CEILINGS W/ LED LIGHTING

Our patented tray ceiling allows a complete section of the ceiling to drop down and slide away to expose the emergency escape hatch. This eliminates the need for a separate cut away section of the ceiling.

Perimeter light ceilings have concealed LED light strips around the perimeter and solid metal panels.

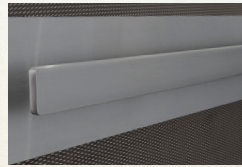

Eleclip Tray Ceiling Down Light (LED Perimeter Lighting also available)

HANDRAILS

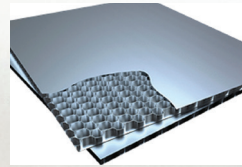

1 1/2 Round Handrail

3/8 x 2 Flat Stainless Steel Rail

Fire Rated Particle Board

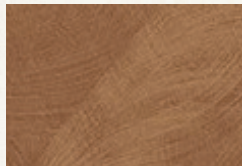

Aluminum Honeycomb

ELECLIP IS EXCLUSIVELY MANUFACTURED BY CONCEPT ELEVATOR GROUP

Concept Elevator Group was founded in 2003 in Miami, Florida. The vision was to create a dynamic company that could be the best manufacturer of elevator cabs and entrances while maintaining the best lead times in the industry. Since the company was founded on quality and customer service, one of the first milestones was the completion of ISO 9001 certification. In addition to quality, the vision included product innovation. Concept Elevator has the ability to design products that not only meet the design intent, but products that minimize installation time and make customers more competitive in the marketplace. Innovative products and designs allow Concept Elevator to maintain one of the lowest labor installation rates in the industry.
